

Community Garden Management System - Sample Usability Feedback

FICTITIONAL SAMPLE: The responses below are invented examples for preparing the form. No human usability session was conducted for this document. Replace them with actual tester feedback before submission.

Fictional Tester A

Example context: Illustrative member tasks on a desktop browser

Session date: Not conducted - fictional example.

Rating scale: 1 = very difficult/poor; 2 = difficult; 3 = acceptable; 4 = easy/good; 5 = very easy/excellent.

Dimension	Example rating	Fictional feedback
Ease of navigation	4	The main menu makes the garden pages easy to find. A short first-use guide could help new members.
Readability	4	Headings and labels are easy to follow. Slightly larger secondary text would help some readers.
Interface design	4	The garden colors and consistent page layout make the interface feel organized.
Button/link placement	4	The main actions are easy to locate. Keep the primary action in a consistent position across forms.
Error messages	5	Messages beside invalid fields explain what needs to be corrected.
Mobile responsiveness	4	A separate mobile navigation menu is useful. Check long content and tables on smaller phones.
Overall ease of use	4	The main member tasks seem straightforward after a brief introduction.

Example positive comment: Clear navigation and helpful form errors.

Example suggested improvement: Add a brief guide explaining the plot-request process.

Actual tester name/initials: _____ Date: _____

Actual device/browser: _____

Actual task results and evidence filename: _____

Community Garden Management System - Sample Usability Feedback

FICTITIONAL SAMPLE: The responses below are invented examples for preparing the form. No human usability session was conducted for this document. Replace them with actual tester feedback before submission.

Fictional Tester B

Example context: Illustrative first-time member tasks on a phone

Session date: Not conducted - fictional example.

Rating scale: 1 = very difficult/poor; 2 = difficult; 3 = acceptable; 4 = easy/good; 5 = very easy/excellent.

Dimension	Example rating	Fictional feedback
Ease of navigation	4	The mobile menu provides access to the main member pages. A more prominent menu hint could help first-time users.
Readability	4	Page titles are clear. Important status information could stand out more.
Interface design	4	The screens have a consistent appearance and a recognizable garden theme.
Button/link placement	3	Some secondary actions could be easier to distinguish from the main action.
Error messages	4	The messages are understandable. Include a short example where a field has a specific format or length.
Mobile responsiveness	3	The mobile menu is useful. A simplified presentation of dense tables could improve the small-screen experience.
Overall ease of use	4	Common tasks appear manageable, with room to improve guidance for new users.

Example positive comment: Consistent design and access to member pages from the mobile menu.

Example suggested improvement: Use clearer primary-action emphasis and check table readability on phones.

Actual tester name/initials: _____ Date: _____

Actual device/browser: _____

Actual task results and evidence filename: _____

Community Garden Management System - Sample Usability Feedback

FICTITIONAL SAMPLE: The responses below are invented examples for preparing the form. No human usability session was conducted for this document. Replace them with actual tester feedback before submission.

Fictional Tester C

Example context: Illustrative member tasks on a laptop and phone

Session date: Not conducted - fictional example.

Rating scale: 1 = very difficult/poor; 2 = difficult; 3 = acceptable; 4 = easy/good; 5 = very easy/excellent.

Dimension	Example rating	Fictional feedback
Ease of navigation	5	The menu labels make it easy to choose the page needed for a task.
Readability	4	The layout supports scanning. Keep explanatory text concise and visible.
Interface design	4	Related pages follow a consistent visual structure.
Button/link placement	4	The action buttons are generally predictable. Maintain consistent wording for similar actions.
Error messages	4	Validation messages help identify the field to fix. Preserve entered data when showing an error.
Mobile responsiveness	4	The mobile navigation pattern is appropriate. Check forms in both portrait and landscape orientations.
Overall ease of use	4	The interface appears suitable for routine member tasks after basic orientation.

Example positive comment: Predictable page labels and consistent layouts.

Example suggested improvement: Provide a short help example and review the wording of related action buttons.
